CRIMINAL JUSTICE AGENCY PROCESSING STATISTICS

INTRODUCTION

IN AN EFFORT TO ASSIST DECISION MAKERS, THE OFFICE OF RESEARCH AND STATISTICS DEVELOPED THIS DOCUMENT TO PROVIDE A SYNOPSIS OF THE TRENDS IN CRIMINAL JUSTICE PROCESSING STATISTICS WHICH HAVE OCCURRED OVER THE MOST RECENT FISCAL YEARS. AN EFFORT HAS BEEN MADE TO CAPTURE ON A MONTHLY BASIS STATISTICAL DATA WHICH PROVIDES SOME INDICATORS AS TO THE CHANGES IN OFFENSE AND ARREST PATTERNS, LOCAL JAIL POPULATIONS, PAROLE AND PROBATION CASELOADS, STATE CORRECTIONAL INSTITUTION POPULATIONS AND PAROLING AUTHORITY ACTIVITIES. IN EACH SECTION OF THE REPORT A BRIEF DESCRIPTION OF THE DATA SOURCES AND RECENT TRENDS IS PRESENTED. THIS REPORT ACTS AS A REPRESENTATION OF THE EVENTS WHICH HAVE OCCURRED OVER THE PAST TWO FISCAL YEARS. CAUSE-EFFECT RELATIONSHIPS CANNOT BE DRAWN FROM THE VARIOUS DATA PRESENTED. HOWEVER, RELATIONSHIPS IN TRENDS CAN AID USERS OF THIS DOCUMENT IN OBTAINING AN INDICATION OF POSSIBLE FUTURE TRENDS.

OFFENSES AND ARRESTS

Data Sources

The information contained in the offenses and arrests section of the Agency Processing Statistics is based upon data tabulated through the State-wide Uniform Crime Reporting program managed by the Maryland State Police Criminal Records Central Repository (CRCR). Each month, summary data on offenses and arrests is compiled and submitted to CRCR by each of Maryland's 134 law enforcement agencies. These reports are edited and prepared for data entry. Computer generated output reports are produced to summarize the information received in a variety of formats. CRCR then provides monthly summaries of the offense and arrest data to the Office of Research and Statistics.

Comparisons of data trends occurring between FY 1986 and FY 1985 have been graphically depicted in charts. Index Offenses - Total, Property and Violent are displayed (page 3) as well as a comparison of Total Offenses (reported) and Adult Arrests (page 4). Data associated with these graphs is provided in tables for each fiscal year (pages 5 and 6). A quarterly comparison of the changes in reported index offenses over these two fiscal years is also provided (page 7).

Recent Trends

Total offenses were up 6.0% from 230,351 in FY 1985 to 244,124 in FY 1986. This growth occurred in all index crime categories, with increases ranging from 0.1% in Aggravated Assault to 27.2% in Motor Vehicle Theft. Combined categories of offense data show that violent offenses (murder, rape, robbery, and aggravated assault) increased 2.0% from 36,083 in FY 1985 to 36,780 in FY 1986. Property Offenses (burglary, larceny and motor vehicle theft) increased 6.7% from 194,268 in FY 1985 to 207,344 in FY 1986. See pages 3, 5, 6, and 7.

Adult arrests increased 2.5% from 169,922 in FY 1985 to 174,128 in FY 1986. It should be noted that offense data is collected for only index crimes (murder, rape, robbery, aggravated assault, burglary, larceny and motor vehicle theft) and only when they are reported. Arrest data encompasses not only index crimes but other crimes, generally considered less serious. Offense data and arrest data are, therefore, mutually exclusive and difficult to compare to each other.

Data on juvenile arrests in tables 5 and 6 show a reversal of the previous declining trend. The number of juveniles arrested in FY 1986 was 38,866, a 3.6% increase from the 37,519 juveniles arrested in FY 1985.

LOCAL JAIL STATISTICS

Data Sources

The information contained in this section of the Agency Processing Statistics is derived from Statewide data collection efforts by the staff of the Maryland Commission on Correctional Standards. The Commission staff tabulates and summarizes data submitted by local jurisdictions. Statewide aggregate data reflecting monthly trends for Fiscal Years 1985 and 1986, spanning all local jurisdictions, are displayed as value lines in the following charts: Average Daily Population in Local Jails, Local Versus DOC Sentenced Inmates, and Awaiting Trial, PSI and Other (Jail Population) on pages 9 to 11. The fiscal year data (FY 1985 - FY 1986) used to derive these charts is presented in the tables on page 12. The Statewide Average Daily Population is calculated by Commission staff. Data on the status of local jail prisoners (sentenced, awaiting trial, etc.), the intake and the departures represent end of month actual counts forwarded to the Commission and aggregated.

Recent Trends

The FY 1986 average daily population in local jails increased 10.2% over FY 1985 (FY 1986 - 5,172 v. FY 1985 - 4,693). This growth in the average daily population incarcerated in local jails is reflected in the chart on page 9. The previous pattern of parity between total intakes and departures in FY 1985 (69,826 v. 69,424), has been broken by the significant increase in intakes over departures in FY 1986 (73,710 v. 71,589). This indicates that future average daily population levels could be higher than the present levels (FY 1986 average: 5,172 v. FY 1985 average: 4,693).

A complex interaction of jail population factors influences population growth as reflected in the average daily population. Expressed as monthly averages these factors are: 1) local sentenced prisoners, 2) DOC sentenced inmates and 3) prisoners awaiting trial, pre-sentence investigation or others (see the table on page 12). Local sentenced prisoners increased from an average of 1,507 in FY 1985 to an average of 1,607 in FY 1986. The influence of DOC sentenced backup on local jail population is not significant because the average of these prisoners dipped from 112 in FY 1985 to 95 in FY 1986 (see the chart on page 10). The number of prisoners in local detention awaiting trial, pre-sentence investigation or in an undefined other category may be a significant population factor based on the 13.9% increase in these prisoners from 3,054 in FY 1985 to 3,479 in FY 1986 (see the chart on page 11). The inmates awaiting trial is the leading subgroup in this growth category. Caution must be used in extrapolating this data in the context of local conditions at each jail and detention center.

PAROLE AND PROBATION STATISTICS

Data Sources

The information contained in the Division of Parole and Probation section of the Agency Processing Statistics is based upon an automated information system and is summarized on a Statewide basis by the Office of Research and Statistics. The Cases Under Active Supervision (see charts at pages 18 & 19 and tables at pages 24 & 25), Cases Being Administered (see charts at pages 20 & 21 and tables at pages 26 & 27) and the intake data (see charts at pages 14 & 15 and tables at pages 22 & 23) were all extracted from the OBSCIS II automated system. Case Closings data (see charts at pages 16 & 17 and tables at pages 22 & 23) was derived by means of a formula comparing intakes to monthly changes in the Cases Being Administered totals.

Recent Trends

During Fiscal Year 1986, the Division's Cases Under Active Supervision fell from 45,528 to 44,810 cases, representing an annual decrease of 1.6%. This compares to a decrease in Fiscal Year 1985 of 2.7% (see charts at pages 18 & 19 and tables at pages 24 & 25). While Active Cases decreased in Fiscal Year 1986, Total Cases Being Administered by the Division increased 0.9%, from 81,454 to 82,163 cases. This compares to a growth of 4.3% in Fiscal Year 1985 (see charts at pages 20 & 21 and tables at pages 26 & 27).

The primary factor contributing to a lower percentage increase in Total Cases Administered during Fiscal Year 1986 was the continued contrasting trend of Intakes and Closings. The total number of case intakes processed during Fiscal Year 1986 decreased 1.1%, from 46,183 to 45,693, while case closings in Fiscal Year 1986 increased 5.1%, from 42,821 to 44,984. This significantly reduced the gap between Intakes and Closings, causing a continued leveling in the previously dramatic growth patterns experienced as recently as Fiscal Year 1983.

The increase in Cases Being Administered and the simultaneous decrease in Cases Under Active Supervision reflects a steadily growing percentage of non-active and delinquent cases in the Cases Being Administered category. At the end of Fiscal Year 1985, 55.9% of the Cases Being Administered were in an Active status (i.e. not delinquent or non-active). By the end of Fiscal Year 1986, only 54.5% of the Total Cases Being Administered were under active supervision.

DIVISION OF CORRECTION STATISTICS

Data Sources

The information contained in the Division of Correction section of the Agency Processing Statistics is based upon data from a combination of manual and automated information systems that are summarized at the Office of Research and Statistics. The monthly average total populations (see charts at pages 30, 31 & 33 and table at page 36) are calculated from daily population sheets submitted by the Data Processing Office of the Division of Correction. The daily population sheets are manually compiled at Division Headquarters based on telephone reports from each institution. Intake and Release information (see charts at pages 30, 31, 32, 34, & 35 and tables at pages 37 & 38) is compiled from monthly reports sent to the Office of Research and Statistics by the individual DOC institutions. Average sentence length by jurisdiction and life and death sentence by jurisdiction information (see tables at pages 39, 40, 41 & 42) is based upon information from the male and female reception centers. This information is also received monthly and applies only to new court commitments.

The Inmate Characteristics Report (see tables at pages 43 thru 49) is based almost entirely upon data from the Offender Based State Correctional Information System (OBSCIS). The only exception is that manual population data is used in the Sex Distribution table at page 43 to allow comparisons to be made between the actual population and the computerized counts for each institution. All of the remaining characteristic information is extracted from OBSCIS via a computerized data interface software package.

Recent Trends

During FY 1986, the Division's average daily total population increased by 2.2% from 12,507 during July to 12,781 during June. The lowest monthly population occurred during January when an average of 12,451 inmates were committed to the Division. Population data is displayed on charts at pages 30, 31 & 33.

The most significant factor contributing to the growth in population was increasing intakes. Total intakes numbered 6,297 or 525 per month during FY 1986, compared to 5,694 or 475 per month in FY 1985. Total releases increased from 5,644 or 470 per month in FY 1985 to 5,839 or 487 per month in FY 1986. Total intakes increased 10.6% between fiscal years while total releases increased by 3.5%. Intake and release information is presented on data tables at pages 37 & 38 and the charts at pages 30, 31 & 33.

Escapes, presented on the data tables at pages 37 & 38 and the chart on page 35, have increased by 18.8% from 80 in FY 1985 to 95 in FY 1986. Expiration/mandatory releases have increased by 3.6% from 2,884 in FY 1985 to 2,987 in FY 1986. Parole releases during this same period have decreased slightly from 1,695 to 1,653 (see data tables at pages 37 & 38 and the chart at page 34).

The average length of sentence for new court commitments (see tables at pages 39 and 41) has increased by 0.5 months from 54.0 in FY 1985 to 54.5 in FY 1986. Life sentences to the Division have increased from 71 in FY 1985 to 78 in FY 1986.

The Inmate Characteristics of the Division's population as of the end of FY 1986 are nearly unchanged from the end of FY 1985. The average sentence length of inmates incarcerated at year end increased by 0.4 of a month to 138.1 months. The age, sentence, race and offense distributions have remained unchanged.

*THE NUMBERS (#) LISTED FOR EACH JURISDICTION REPRESENT THE ACTUAL NUMBER OF COURT COMMITMENTS FOR THE RESPECTIVE MONTHS NOT INCLUDING LIFE SENTENCES AND DEATH SENTENCES. THE AVERAGE LENGTHS OF SENTENCE (AVG. LOS) WERE CALCULATED USING THE HIGH RANGE OF THE FOLLOWING SENTENCE RANGES: 3 MONTHS, 4-6 MONTHS, 7-12 MONTHS, 13-18 MONTHS, 19-24 MONTHS, 25-36 MONTHS, 61-96 MONTHS, 97-120 MONTHS, 121-180 MONTHS, 181 MONTHS AND OVER. THE HIGH RANGE WAS USED BECAUSE MOST SENTENCES FALL AT THE UPPER END OF EACH RANGE. 300 MONTHS WAS USED FOR THE 181 MONTHS AND OVER CATEGORY.

NOTES: 1 INTERSTATE COMPACT COMMITMENT IS INCLUDED IN THE JULY TOTAL.

The totals for the inmate characteristics contained in this report, with the exception of the sex distribution table, represent the OBSCIS I system data available for the respective categories on the date of the report. The totals on the Sex Distribution table represent the actual total population on the date of the report. Information for an additional 91 inmates housed in local jails is not available. Note that approximately 5 of the inmates listed at PRUW are federal inmates being contractually housed there.

NOTES: AVERAGE SENTENCE LENGTH IS CALCULATED BASED ON TOTAL SENTENCE LENGTH AND DOES NOT INCLUDE LIFE SENTENCES. AVERAGE LENGTH OF STAY REFLECTS THE AVERAGE LENGTH OF TIME SERVED IN THE D.O.C. AS OF THE DATE OF THE REPORT. THIS FIGURE IS NOT BASED ON RELEASES AND MAY INCLUDE TIME SERVED AT MORE THAN ONE INSTITUTION.

THE LENGTH OF STAY AT MRDCC INCLUDES PREVIOUS TIME SERVED BY INMATES RETURNED FROM PAROLE, MANDATORY, ESCAPE AND PATUXENT RELEASES. WHEN THESE TYPES OF RETURNS ARE EXCLUDED, THE LENGTH OF STAY AT MRDCC IS APPROXIMATELY 2 MONTHS.

NOTES: AVERAGE SENTENCE LENGTH IS CALCULATED BASED ON TOTAL SENTENCE LENGTH AND DOES NOT INCLUDE LIFE SENTENCES. AVERAGE LENGTH OF STAY REFLECTS THE AVERAGE LENGTH OF TIME SERVED IN THE D.O.C. AS OF THE DATE OF THE REPORT. THIS FIGURE IS NOT BASED ON RELEASES AND MAY INCLUDE TIME SERVED AT MORE THAN ONE INSTITUTION.

THE LENGTH OF STAY AT MRDCC INCLUDES PREVIOUS TIME SEVED BY INMATES RETURNED FROM PAROLE, MANDATORY, ESCAPE AND PATUXENT RELEASES. WHEN THESE TYPES OF RETURNS ARE EXCLUDED, THE LENGTH OF STAY AT MRDCC IS APPROXIMATELY 2 MONTHS.

PAROLE COMMISSION STATISTICS

Data Sources

The information contained in the Parole Commission section of the Agency Processing Statistics is based upon data recorded by Parole Commissioners and Hearing Officers and tabulated monthly by Parole Commission staff from hearing dockets. Parole Commission activity relating to Division of Correction (DOC) and local jail inmate parole evaluation hearings is reported separately. The reported activity relating to revocation of parole hearings at DOC and local jails are combined. The vast majority of this activity occurs at DOC.

The Parole Hearing data presented in charts at pages 51 through 55 and the tables at pages 57 and 58 are based upon the recommendations rendered by Parole Commission Hearing Officers and Parole Commissioners during an inmate's parole hearing. The four basic recommendations that can be made are: 1) approve parole release, 2) refuse parole release, 3) reschedule the inmate for a rehearing at a later date, or 4) hold the decision in abeyance until further information is obtained to determine parole eligibility. These recommendations do not constitute a final decision until adopted by the Commission or affirmed after appeal by the inmate. The Parole Revocation Hearing dispositions presented in charts at page 56 and the table at page 59 are based upon the decision rendered by Parole Commissioners when inmates have been charged with failing to comply with the conditions of their parole release. These charges of noncompliance with the conditions of release can be divided in two broad categories: New Offenses (where a parolee has been primarily charged with committing a new crime while under parole supervision) and Technical Violations (where a parolee is charged with failing to comply with such conditions of release as reporting to an agent, absconding from supervision, failing to attend treatment programs as directed, etc.). At the time of a revocation hearing, the Parole Commission can decide to revoke parole, continue parole supervision, hold the case for further information, or administratively close the case.

Recent Trends

Parole evaluation hearings for DOC prisoners decreased from 6,408 in fiscal year (FY) 1985 to 5,008 in FY 1986. Concomitantly the parole evaluation hearings for jail inmates decreased from 892 in FY 1985 to 753 in FY 1986. The revocation hearing activity decreased from 975 in FY 1985 to 779 in FY 1986. Variation in parole evaluation hearing levels and their outcomes is influenced by complex factors including: institutional population levels, legislative enactments establishing parole eligibility and Parole Commission policies.

**Due to rounding, the sum of the individual averages may not equal the total average.

PATUXENT INSTITUTION

Data Sources

The information contained in the Patuxent Institution section is based upon data from a combination of manual and automated information systems that are summarized by the Office of Research and Statistics. The data on Average Monthly Population, Institutional Activity, and Discharges is manually compiled by the Patuxent Office of Research and Evaluation based upon internal institution reports (see tables at pages 61 and 62). The Inmates Characteristics Report (see tables at pages 43 thru 49 of this publication) is based almost entirely upon data from the Offender Based State Correctional Information System (OBSCIS I). The only exception is that the manual population data is used in the Sex Distribution table, at page 43 of this publication, to allow comparisons to be made between the actual population and the computerized count for Patuxent.

Recent Trends

During FY 1986, the Patuxent Institution average monthly total population decreased to 600, which represents less than a 0.4% decrease from the corresponding FY 1985 average (FY 1986 - 600; FY 1985 - 602). The average for the population of resident eligible persons increased by slightly more than 1.0% over the corresponding average for the prior fiscal year (FY 1986 - 468; FY 1985 - 462). The total number of Patuxent inmates under parole supervision in the community ranged from 75 to 91 during this fiscal year with an average of 84 for the period. In FY 1986 the average for Patuxent parolees under supervision in the community increased by 9.1% over the corresponding average for prior fiscal year (FY 1986 - 84; FY 1985 - 77). The DOC Housed Inmates category, which represents those DOC inmates who are temporarily housed at Patuxent but are not currently under evaluation for admission to Patuxent's program, decreased from an average of 128 during FY 1985 to an average of 83 during FY 1986 (see Section I of tables at pages 61 and 62).

The total intake to Patuxent Institution during FY 1986 has increased by 17.6% to 368 as compared to 313 in FY 1985. Discharges* during this period grew from a total of 313 in FY 1985 to 356 in FY 1986 or an increase of 13.7%. No escapes occurred during either FY 1985 or FY 1986 (see Section IV of the tables at pages 61 and 62.) The Inmate Characteristics of the Patuxent population as of the end of FY 1986 were relatively unchanged from the end of FY 1985. (See tables at pages 43 thru 49).

*It should be noted that the discharge data is limited to the residential population and does not include release of inmates to the community after parole to the halfway house.
